Dear Komputrol Software User,

CLERK - TREASURER

Unfortunately, we cannot control natural disasters and protecting your valuable work has become extremely important. The volume of data required to be saved and managed continues to increase every year, as does the cost of recreating those records if a disaster happens to strike. Knowing that your data is safe and the items you need to continue taking care of business are protected, will allow you concentrate on the more important issues of a disaster in your community. And eliminating the need to keep duplicate paper records is good for the environment.

High

The Indiana State Board of Accounts requires that you have a written Disaster Recovery Plan in place. The Komputrol Disaster Recovery webpage at www.boycesystems.com gives you a general outline of how to prepare this written plan and also explains how Komputrol's Disaster Recovery Service can assist with meeting the SBOA requirements and implementing your plan.

Performance

For an annual service fee Komputrol will provide: **Annual Record Storage, Offsite Storage, and A Back-Up Support Site.** These items are fully explained in the body of the enclosed agreement, as well as on the Disaster Recovery webpage. If you wish Komputrol to convert other computerized or manual records to CD-ROM (such as board meeting minutes, contracts, etc.), Komputrol will do so as part of **Additional Billed Services.** Price quotations will be provided upon your request.

Information

If you are a current Disaster Recovery Service member we urge you to continue, if not, please consider participating. Protecting the countless hours of work you have performed on your computer system is good business. Komputrol's Disaster Recovery Service can turn these potential catastrophes into temporary setbacks. You won't find better 'insurance' for the safety of your data.

Solutions
